

DIRIGO SOLAR

EASTERN SLOPE REGIONAL AIRPORT AUTHORITY 4.99 MWAC SOLAR PROPOSAL

AUGUST 15, 2019

INFO@DIRIGOSOLAR.COM

About Us

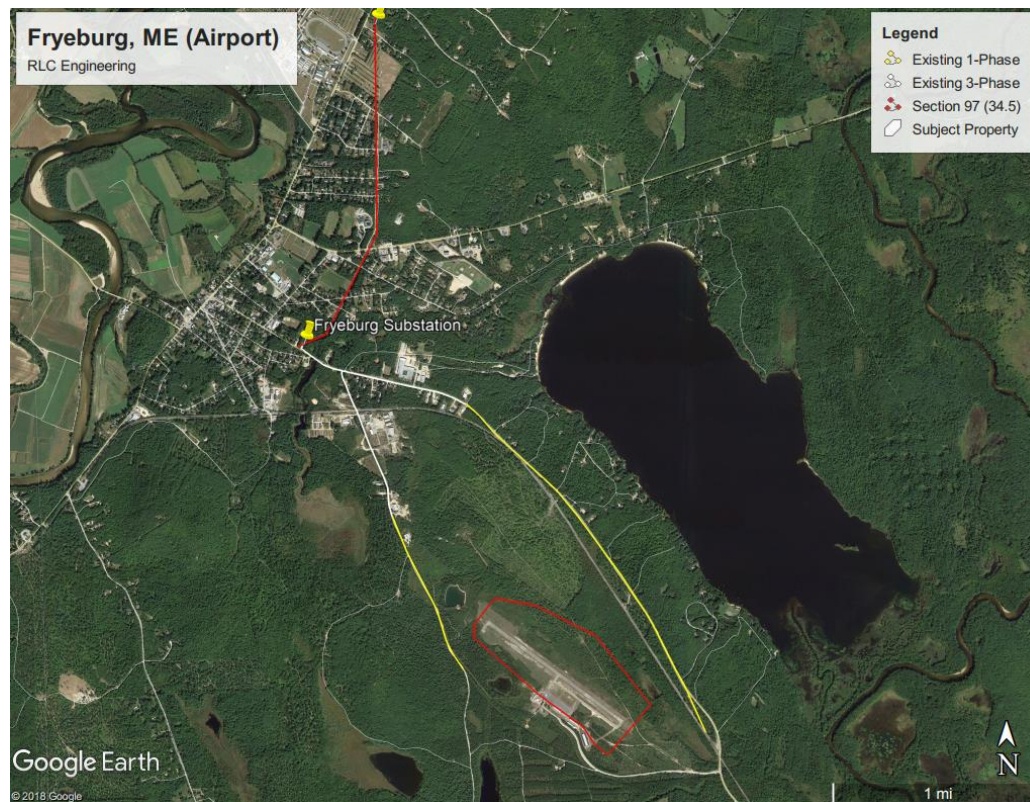

- Dirigo Solar LLC is a Maine-based renewable energy project development company with a focus on utility-scale and community solar photovoltaic (“PV”) power plants.
- Dirigo was awarded a long-term power purchase agreement (“PPA”) by the Maine Public Utilities Commission (“MPUC”) for up to 75 MW and projected to save Maine homes and businesses between \$3 and \$26 million.
- Dirigo has partnered with BNRG Renewables, based in Dublin, Ireland, to construct, own, and operate the solar facilities.
- BNRG has developed, financed, and constructed over 115 MW of ground mounted and rooftop projects comprising approximately \$269 million in value in Oregon as well as the UK, Northern Ireland, Bulgaria, and Greece.
- Every project that BNRG has completed has exceeded its initial projections. This is a function of the careful attention to design optimization and technology selection. The Company has dedicated a considerable resource to getting these elements fine tuned to deliver value and exceed expectations for host communities

Project Summary

- **System Size**: 4.99 MWac on approximately 29 acres
- **Substation**: Fryeburg (~2.31 miles from site)
- **Interconnection**: Distribution 12.47kV

Preliminary Design
